

# LOCAL NEWSLETTER SEPTEMBER 2019

## / NEW CRANE IN PLACE

Since our last update, we have continued to erect the steel frame around the building and have started concreting each of the floors.

We have also replaced one of the cranes, which is now positioned on the concrete core of the building. The series of operations that involved swapping the cranes was carried out as planned over the weekend of 6-8 September. This operation will now allow us to continue with the heavy concrete lifting needed as the construction progresses.

Mechanical and electrical works are now underway in the building's basement. We have also begun to extend our staff welfare areas in the basement to accommodate the anticipated increase in workforce. We will soon have around 550 people working on the site.
