

LOCAL NEWSLETTER MAY 2020

/ CONSTRUCTION WORKS UPDATE

- We are making good progress on site with the building works. All of the roofs will be water tight by the end of May. As you can see from the photos, the cladding panels on the face of the building are now complete. This enables us to start the Green Wall
- The internal fit out is progressing well, with progress up to level 9 within the building.
- The installation of the lifts within the cores of the building will be complete within the month.
- We are planning the removal of the scaffolding surrounding the bridge in June 2020.
- We have also been busy this month preparing for the removal of the crane from the top of the building. The crane will be removed in early July.
